

THE DAILY WATCH

As we continue with our semester, October has proven to be an active month for our IBDP community. From engaging in international events, to CAS activities that inspire creativity and service, to dynamic science labs and experiments that spark curiosity, our students have embraced opportunities for growth and exploration. Join us as we reflect on the exciting events and achievements that have marked this promising start to the academic year. Here's to a month filled with innovation, collaboration, and the joy of learning!

Teachers' Day Celebration

Teachers and the Principal are joyously posing for photos

This year, our school marked Teacher's Day with a sincere gathering to pay tribute to our amazing teachers. The DP students played a significant role by making custom posters, distributing flowers and chocolates, and creating a cozy, inviting setting. The mood was brimming with happiness as students and educators enjoyed spirited times and preserved memories through photographs. The day was a mixture of thanks everywhere, artistic expressions on the walls and gifts, and the overall festivity, highlighting our recognition of the direction and assistance our teachers offer.

PYP students greeting their teacher with flowers

The celebration was made even more special by the return of a few of our former students, who came back to show their appreciation to the educators who guided them along their paths. The addition of dance shows by the students brought life to the event, with all participants deeply engaged in the festive atmosphere. The addition of present students and former students sent out a powerful message of gratitude and esteem, making it a memorable, complete experience for everyone involved. Teacher's Day inspired us and brought to light the lasting influence that teachers have on our existence.

DP students welcoming the Principal with card and flowers

Surprised teachers making their way towards the celebration of Teachers' Day

Preparing the salad to go with the main dishes

They also made Eggplant Bharta and a refreshing salad to balance out the meal. It was a fun way for the teachers to bond and share their love for food.

Teachers' Cooking Day

The DP teachers have had an amazing opportunity to share and cherish a wonderful experience on the teacher's cooking day. Our wonderful teachers collaborated to cook some amazing dishes from the Bengali cuisine. The main stars were the Chicken Biryani which is full of rich spices and tender chicken and the Egg Korma with its flavorful gravy.

Super busy with cooking the main dish!

Teachers are busy cooking and enjoying the food

Delicious mashed eggplant cooked by the teachers!

Award Ceremony

Australian International School has recently concluded Term 1 of the academic session 2024–2025. The teachers organized an award ceremony to acknowledge the efforts of the DP students as a way to commemorate the completion of the term. The ceremony was held on 9th October Wednesday, which was also the last day of term 1.

DP 2 student, Marzouq Raihan is pleased to receive his award

DP 1 student, Inaaya Hossain is happily receiving her certificate

Award	DP 1 Students	DP 2 Students
Busy Bee	Md. Ahnaf Hossian Saad	Maanha Anoom Khan
Captivating Comedian	Reza Shah Nayazi	Tanzil Hassan Mahir
Do-nut	Wania Hassan	Nusrat Rahman Tashin
Excellent Effort	Adrita Labonno Banik Ahnaf Abrar Iskrak	Efaz Abrar Osman
Humble Helper	Sanaa Malik	Marzouq Raihan
Organization Sensation	Deena Farzana Alam	Samarah Haque
Persistently Polite	Inaaya Hossain Humaira Nasreen	Zunairah Nayaab Anam
Quick Thinker	Arfan Zafer Fayad Moumita Naz Alam	Mushfiqe Kamal
Yes I Can	Azmaien Areeb Zaman	Jayraj Chakraborty

UN Day Celebration

Our recent UN Day celebration brought together all year levels in a vibrant display of creativity and awareness. The event began with insightful speeches from students, highlighting the significance of the United Nations in promoting peace, sustainability, and global cooperation.

The IBDP students played a pivotal role in the festivities, organizing a dynamic charades game where participants acted out the Sustainable Development Goals (SDGs). This interactive activity not only entertained but also deepened our understanding of global issues and the importance of collective action.

DP 2 students performing together on the occasion of UN Day celebration

Our principal delivered an inspiring speech, emphasizing the vital role of the UN in shaping us as responsible global citizens. He urged everyone to engage actively with the SDGs and to recognize our responsibility in addressing global challenges.

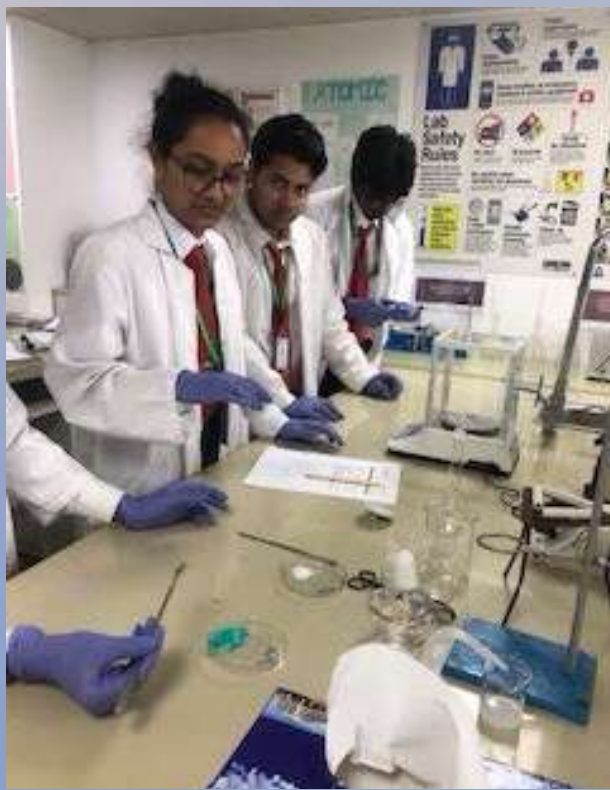

PYP students reciting a poem on the UN Day

In addition to the charades, students performed captivating rhymes and other creative pieces that celebrated cultural diversity and unity. These performances underscored the values of empathy and collaboration that the UN embodies.

The UN Day celebration was a powerful reminder of our shared commitment to creating a better world, reinforcing the idea that each of us can contribute to positive change.

Experiential Learning in Chemistry laboratory

Students are experimenting with different chemicals in the laboratory

Our recent chemistry lab focused on determining the unknown empirical formula of hydrated copper chloride, $\text{CuCl}_x \cdot y\text{H}_2\text{O}$, was a valuable hands-on experience in practical learning. Divided into two groups, we went into the experiment with a range of lab equipment, some of which were new to us. Working through the steps ourselves, we saw how crucial each method was to the outcome, learning that practical experience often teaches best. While the process required careful attention, it was empowering to handle each step directly and see our results unfold.

Even with a couple of small accidents and some chemical spills, both teams were able to reach their goals by the lab's end, leaving us feeling successful. There were a few mistakes in measurements, but the educational process was enjoyable and beneficial. The comprehensive lab report that follows will explore the reasons behind these mistakes and assist us in enhancing our skills. This lab experiment highlighted that engaging in experimentation through trial and error not only enhances comprehension but also makes the learning experience enjoyable and unforgettable.

Future chemists are learning how to turn their ideas into reactions!
